

With aging, organ functionality gradually decreases due to cellular deterioration, primarily caused by oxidative stress, resulting in a loss of vitality and quality of life.

This decline in organ function predisposes individuals to chronic degenerative diseases.

Damage caused by oxidative stress includes trauma, exhaustion, and overtraining.

The inclusion of cellular extracts, cytokines, and embryonic growth factors provides a revitalizing and renewing effect at the cellular level, improving the specific func-

tionality of the affected organ.

Antioxidant enzymes neutralize free radicals, thus reducing oxidative stress damage.

The components of the formula reach cells directly or indirectly through the bloodstream, especially in the case of oral products, and are selectively incorporated into cells through various means of cellular transport.

Benefits

- Cellular revitalization of skin and muscle
- Improves skin's overall appearance
- Muscle support
- supports repair of damaged muscle cells
- Provides elasticity and helps tone skin

Highlights

- Contains cellular extracts from different tissues that can provide growth factors and cytokines contributing to cellular revitalization.
- Includes antioxidant enzymes that help neutralize free radicals.
- The formula contains vitamins and minerals important for various cellular and metabolic functions.

Recommended Use

- **Preventive Therapy:** Two tablets in the morning. Two tablets at night. Duration: At least six months.
- **Adjuvant Therapy:** Two tablets in the morning. Two tablets at night. Duration: At least six months.
- **Trauma and Muscle Injuries:** Two tablets in the morning. Two tablets at night. Supplement with Bioenzym™: Two tablets in the morning. Two tablets at night. Duration: At least three months.
