

With age, organ functionality progressively declines due to cellular deterioration, primarily caused by oxidative stress, resulting in a loss of vitality and quality of life.

This organic subfunctionality predisposes individuals to chronic degenerative diseases.

Damage from oxidative stress includes renal and degenerative diseases.

The provision of cellular extracts, cytokines, and embryonic growth factors exerts a renewing and revitalizing effect at the cellular level, increasing the specific functionality of the organ being treated.

Antioxidant enzymes neutralize free radicals, reducing oxidative stress damage.

Benefits

- Prevents risk for degenerative diseases of the renal system
- Supports improved filtration and kidney functions
- Stimulates revitalization of nephrological cells

Highlights

- It includes homeotherapeutic cellular extracts from Kidney, Thymus, Placenta, and Embryonic Mesoderm. These provide essential nutrients for the cells and tissues associated with renal function.
- It contains Biolastin, which may contribute to the antioxidant and anti-aging effects of the product.

Recommended Use

- **Preventive Action:** Take 2 tablets in the morning and 2 tablets at night, for at least 3 months.
- **Adjuvant Action:** Take 2 tablets in the morning and 2 tablets at night, for at least 6 months
